THIS IS UNEVALUATED INFORMATION

2. A hard surfaced, all weather road [#924] which is over two lanes wide runs from Sibiu westward to Sebes via Cristian and Mercurea. Another hard surfaced all weather road [#924] runs from Sibiu southward to Ramnicul Valcea. 25X1
3. Both roads are designed for heavy usage with a minimum of maintenance and are concrete paved. The roads are considered to be first class highways. The roads have a good solid foundation.
4. A number of loose surfaced, graded all weather roads [#903] run in the vicinity of Cristian, Rasinari, Saliste and Topardea. The roads are over two lanes wide, and also designed for heavy usage.
5. A number of dry weather, loose surfaced roads run in the same vicinity [#935] as the all weather roads [#903]. However they are approximately one lane wide. At one time the roads had been cart tracks used by villagers for short cuts but since that time they have been resurfaced by the farmers and villagers. The villagers and farmers resurface the dirt roads when they become rutted and potholed.
6. Two concrete-steel bridges are located between Sacej and Sibiu. One bridge is located approximately one half kilometer south of Cristian and crosses the Tibin river which flows east and west. The bridge is two lanes wide and is in good condition. The second bridge is located east of Sacej. It is also over two lanes wide and is in good condition. Both bridges are capable of absorbing heavy usage.
